

Summary of the Pacific Community's 2015 work programme in Pitcairn

(November 2015 update)

The following table lists key work areas that SPC is undertaking in 2015 in cooperation with Pitcairn. The country-specific work listed here complements other SPC work undertaken at a regional level to benefit the people of Pitcairn and achieve its national development priorities. SPC's key regional work will be presented in its next Programme Results Report (to be published in May 2016).

SPC's expected contribution to national development goals			
Expected long-term result (impact)	Expected medium-term result (outcome)	Key outputs for the year	Status
<i>Pacific Island people reach their potential and lead long and healthy lives</i>			
Integrated Coastal Zone Management			
Increased capacity to effectively manage the risks presented by climate change and disasters	Integrated coastal zone management actions implemented	Pitcairn action plan finalised and adopted. The plan covers improved waste management (integrated waste management plan), soil erosion control, and preservation and promotion of Pitcairn Islands through the sustainable use and management of the environment	Completed
		Erosion control matting and replanting undertaken, and culverts installed in selected areas; Soil erosion matting, pins and culverts procured, erosion control matting laid at St Paul's and Arlihou, and coconut palms and native plants planted	On Track
		Implementation of the integrated waste management plan; Terms of reference agreed, contract signed with the Secretariat of the Regional Environment Programme (SPREP), and data collection is under way	On Track
